DETAILED ACTION

1. Please note that the examiner assigned to this application has changed.
2. Claims 143-162 are pending. After review and reconsideration, the Restriction Requirement mailed June 2, 2004 is vacated.

Election/Restrictions

3. This application contains claims directed to the following patentably distinct species of the claimed invention: methods, processes, compositions and kits comprising:
 - a. ICP47 of HSV type 1,
 - b. IE 12 of HSV type 2,
 - c. a gene encoding a TAP inhibitor,
 - d. an antisense sequence or oligonucleotide which is complementary to mRNA or DNA sequences encoding TAP,
 - e. a RNA-destroying ribozyme targeting TAP mRNA,
 - f. peptide aldehyde Z-Leu-Leu-H,
 - g. Lactacystin,
 - h. DNA encoding a proteosome inhibitor,
 - i. an antisense sequence or oligonucleotide which is complementary to at least in part to the mRNA or DNA sequences encoding proteosome, and
 - j. a RNA-destroying ribozyme targeting proteosome mRNA.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from a through j for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, all claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

Art Unit: 1642

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
